The errata listed below describe situations where DS21Q59 revision A1 components perform differently than expected or differently than described in the data sheet. Dallas Semiconductor intends to correct these errata in subsequent die revisions.

This errata sheet only applies to DS21Q59 revision A1 components. Revision A1 components are branded on the topside of the package with a six-digit code in the form yywwA1, where yy and ww are two-digit numbers representing the year and workweek of manufacture, respectively. The die revision can also be determined through the IDR register at location 0Fh. The four MSBs are fixed to “1001,” indicating the DS21Q59 device. The four LSB’s contain the revision code “0000” on A1 revision devices.
